## Work Experience

### Innobit Systems

October 2023 – Present

#### Software Developer

- Working on US-based Library application that tracks and manages Organisations records while integrating a device service to store and analyze footfall events.
- Integrate **API** Using Redux for state management and added **Multilanguage** using SmartCat Tool and **react-i18next**
- Developed a full-scale web application, handling routing. Implemented **RTK Query** for efficient API data fetching, caching, and state management
- Implemented features in front-end development with React.js and **Redux**, coupled with the ability to create efficient server-side logic using Node.js and Express.js .
- Optimized web application by implementing **lazy loading** and using lightweight packages for improved performance.
- Implemented **pagination** functionality to efficiently manage and display large datasets ,enhancing user experience by enabling seamless data navigation
- **Exposure:** NodeJs, ExpressJs, React,Postgres, RTK Query

## Projects

### Project: Blog App

[Demo](#)

- Built a dynamic and responsive blog application using **Next.js**, supporting server-side rendering and routing.
- Implemented features for viewing blog lists, reading full posts, and navigating through content with clean UI.
- Integrated adding new blog posts with a form-based UI (Add Blog feature).

### Project: Todo App

[Demo](#)

- \* Built a feature-rich To-Do app using **Next.js**, **ShadCN UI**, and **localStorage** for persistent state.
- \* Implemented full CRUD functionality with priority levels, filters (status, date, priority), and search capability.
- \* Enhanced UX with toast notifications, keyboard shortcuts, responsive design, and visual status indicators.

### Project: An API Authentication

[Source Code](#)

- A Node.js API that is going to handle Authentication in any application we want to use it in using **JWT** .
- In this Api, **Mongodb** used as a database, **Mongoose** to create models and to connect to our express server , **bcryptjs** to hash passwords and JWT to check for private routes.

## Technical Skills

**Frontend:** React.js, Redux, **Next.Js**, HTML, CSS, Bootstrap,Tailwind

**Backend:** Node.js, Express.js, TypeScript

**Databases:** SQL, PostgreSQL, MongoDB, MySQL

**Web Technologies:** RTK Query, RESTfulAPIs, JWT, **ShadCN**, **Acertinity**, Socket.IO

**Developer Tools:** Postman, GitHub, BitBucket, Azure (AWS), RMQ, CouchDB, SmartCat, **CircleCi**

## Achievements

- \* Solved **250+** DSA problems from **Leetcode**, **Gfg** building problem solving skills.
- \* Achiever Badge on Coding Ninjas in **LinkedList** , **Array**.
- \* 100 days of code on **LEETCODE 2022**.
- \* 5 Star Badge in **Problem Solving** on **HackerRank** .

## Education

### Inderprastha Engineering College, Ghaziabad (2020 - 2024)

B.Tech in Information & Technology

8 CGPA
